Residents of Northeast and Southeast Sections Insist Educational Facilities Have Not Kept Pace With Growth of Population - Claim Pupils Are Inconvenienced.

Citizens' bodies of both northeast and southeast are uniting in their demands for better school facilities for East Washington. It is esserted that school accommodations in this section have not kept pace with the rapid growth of the community. This is especially true in the northeast, it is asserted, where the ratio of increased population has exceeded that of any other section.

A new Eastern High School and a new school at Rhode Island avenue and Eighteenth street northeast will be urged upon the commissioners for their estimates this year. It is pointed out that a new Eastern school is needed because of the congested condition of the present one, and because of the overflow from East Washington, now being cared for at Central, Business and McKinley.

Rhode Island arenue and between Eighteenth and Twentieth streets recently was non-missed by the District for \$12 er. It is the largest grade school site in the city. North-cast citizens believe on this account, and recause of its proximity to a rapidl, growing community it affords the best chance for the establishment of a model suburban school. It is hoped not only to make the school a model one for primary school purposes, but to plan it with a view to the growing remaining use of a school buildur, and to arrouge for social center and recreation needs and for indeed and outdoor stilled training. Chance For Recreation.

Chance For Recreation.

able for this site makes it possible

to have school gardens, separate

recreation grounds for the younger

and older children, tennis courts,

baseball diamonds, a football feld,

running tracks, swimming and wading pools, and similar features," Mr.

Adams stated.

'The site is so large that the placing of the building can be considered in relation to its artistic setting, and it can be given landships accessories in awares of any other building in the cay. This school building shorted Washington the first opportunity to show what can be done in the proper adoptation of a model building to ample grounds.

Southeast citizens folned with the

her the ast content in proclaiming the need of a new high school in the eastern section of the cits. They also are in agreement with the northeast body in opposing its location on the extreme casterly site of the present jail and workhouse reservation.

"Our association members are in-

"Our association members are in-clined to agree upon any centrally heated site," said I. R. Brooks, secretary of the southeast body. "Or course we should oppose plac-ing the school so far north that it would not be easily accessible for those southeasiern pupils who nor are in a majority among its pupils." It was pointed out, as an argu-ment in favor of a southern location of the school, that the far north-eastern putils in the neighborhood of Eckinston, Brookland and Lang-

"The six acres of ground avail-

Citizens of East Washington, in both the northeast and southeast sections, will make an urgent pleato have the Commissioners include in this year's estimates items which will relieve the crowded condition of sexeral graded schools and of the Eastern High School.

Already active in this movement are the Southeast Washington Citigens' Association, the Northcast Washington Citizens Association and the Rhode Island Avenue Suburban Citizens' Association. Both the former are working for a new Eastern High School, the Northeast body also wishes steps taken to relieve the congestion in the grade schools of the Sixth division, and the Rhode Island Avenue Association wants a new school built on a site already purchased to relieve crowded conditions at the Brookland and the Langdon

High school facilities for East Washington children are considered especially inadequate. The situation will be made worse, it is stated, when the Central High School moves into its new building farther north, and the many East Washington chil-dren now attending there compelled to make a longer trip

Eastern Pupils Inconvenienced.

According to figures gathered by Evan H. Tucker, president of the northeast body, at the offices of the Board of Education, last year Central had 161 East Washington pupils. The number of pupils from the east-ern section of the city was even greater at Rusiness and Mckinley. At the Business Simon their were 43 pupils from east of North Capitol street and at Mckinley Manual Training School there were 22 such pupils.

pupils.
Both McKinley and Business are overcrowded, and have been so for several years. Mr. Tucker nointed out. This year Business is comout. "This year Etistiess is com-pelled to resort to a haif-day session in order to accommodante its pupils, it would not only enable these East Washington pupils to save the long trin across town, but it would re-here the congestion at those schools of Fastern were housed in a new taxed. At one time last year their were 4.1 purpls in the building onli-designed to accommodante 400. The present enrollment at 1 School, with a normal capacity of 100 pupils a heating 1200 Ms. Kindey capacity 1,500 now has an

If Cow Blocks the Way, Milk It

ITHACA, N. Y., Oct. 4.-When a cow lies down in the highway and blocks your automobile do not fuss and fume about it; just go out and milk her and the cow will get out of the way. Carroll Horton, of Okmul-

gee, Okla., has proved the remedy. Horton and several friends were speeding toward Newfield when a big cow ambled out on the highway and spread her bulk square across the road. Then she lay down. The horn caused no alarm to the cow, and coaxing was futile. Horton then jumped out of the automobile. "So boss, so boss." he said in approved Tompkins county style. Then, using his hat as a receptacle, he proceeded to milk the cow. When he had finished the cow left the road.

Our Furniture Sale Continues

In quoting the actual figures below we give you a more definite idea of the amount of money to be saved by taking advantage of our price reductions

Last month the simple statement that we had reduced hundreds of prices was sufficient to give us a tremendously successful sale. Remember, we have many thousands of regular customers who know the reliability of our goods. They also know that our plainly marked prices are always low. It is enough to tell them that we have reduced these figures.

We continue the sale for two reasons:-Many of these old customers are still coming expecting to find the special bargains, and we're glad to have them; for, secondly, we must have more room for new goods that are arriving daily.

There are yet a great many pieces at wonderfully low prices, but you must understand that most of those mentioned mean only the single article specified. We can only guarantee that every one will be here at opening time Monday morning.

All Purchases Will Be Charged at the Reduced Prices-Without Notes or Interest

Lowest Rug and Carpet Prices

Carpets, Rugs, Mattings, Oilcloths, and Linoleums form the most important department in our store. Qualities have been highest; prices have been lowest; but SERVICE has been the greatest of all its attractions.

Every grade of Carpet is made, lined, and laid free, and what may be wasted in cutting to match figures costs you nothing. Your floors are measured and we charge for only what is necessary to cover them.

For Mattings, Oilcloths and Linoleums we measure your floors and give you our lowest prices for just what may be needed. There's no occasion to buy full rolls and waste a lot of remnants. All styles of these floor coverings are laid free, and our experience in doing this work properly will give them many months of additional life.
